PAVAN KUMAR CHINCHALPET

Full Stack Developer (Next.js | Node.js | PostgreSQL)
+91 7032832362 | pavanchinchalpet@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with a results-driven mindset, specializing in building scalable SaaS and web applications using Next.js, React.js, Node.js, NestJS, and PostgreSQL. Experienced in designing robust backend systems, developing high-performance and intuitive frontend dashboards, and implementing secure authentication and authorization workflows. Skilled in performance optimization, caching strategies, and deployment automation, delivering reliable, production-grade applications supporting hundreds of active users.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL APIs, JWT
Databases: PostgreSQL, MongoDB, MySQL, Supabase, Neon
ORMs: Prisma, Mongoose
Caching & Storage: Redis, Wasabi S3
Tools & DevOps: Git, GitHub, Vercel, Render, Postman, VS Code

EXPERIENCE

Full Stack Developer
Datavalley.ai | Jun 2024- Present

- Developed and maintained a **full-stack CRM platform** for student placement and lead management, enabling tracking of student profiles, applications, interview pipelines, and workflow automation.
- Built and optimized **GraphQL APIs using NestJS, Prisma ORM, and PostgreSQL** for efficient handling of leads, contacts, and workflow operations.
- Implemented **OTP-based email authentication and JWT authorization with RBAC** using NestJS Guards to ensure secure and role-based access control.
- Designed **scalable and normalized PostgreSQL schemas** along with a modular backend architecture for maintainable and extensible systems.
- Developed **bulk data ingestion pipelines (CSV/Excel)** with validation and real-time UI feedback to support large-scale data imports.
- Built responsive and high-performance **admin dashboards using Next.js and Tailwind CSS** for streamlined operations.
- Engineered and deployed a **scalable Learning Management System (LMS)** supporting 500+ active users with Admin, Trainer, and Student roles.
- Developed backend services using **Node.js and Express.js** for course management, quizzes, assignments, and assessments.
- Implemented **secure authentication and RBAC mechanisms** across multiple user roles.
- Improved system performance by optimizing **API response times, database queries, and caching strategies**, ensuring efficient handling of concurrent users.

Full stack Developer Intern
Datavalley.ai | Dec 2023 – May 2024

- Assisted in developing and maintaining web applications using the **MERN stack**, contributing to both frontend UI components and basic backend functionalities.
- Built and styled responsive user interfaces using **HTML, CSS, JavaScript, and React.js**, improving usability and page structure.
- Integrated **REST APIs** and implemented dynamic data rendering on the frontend, enabling interactive user experiences.
- Performed **CRUD operations using MongoDB** and supported backend development using Node.js and Express.js.
- Collaborated with team members to debug issues, optimize performance, and follow **Git-based version control workflows** in a real development environment.

PROJECTS

Customer Relationship Management (CRM)

Live: crm.datavalley.ai

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, GraphQL API, Nest.JS, PostgreSQL

- Built a **scalable CRM system** using Next.js and NestJS with a modular architecture (Controller–Service–Repository pattern).
- Developed **REST and GraphQL APIs** for managing leads, contacts, workflows, and role-based operations.
- Implemented **OTP-based authentication and JWT-based RBAC** for secure access control.
- Designed optimized **PostgreSQL schemas** and improved performance using indexing and efficient query handling.
- Developed **bulk CSV/Excel upload functionality** with validation and real-time status tracking in the UI.
- Integrated **third-party services and automated workflows** (email notifications, lead assignment, status updates) to reduce manual effort and improve operational efficiency.

Learning Management System (LMS)

Live: learning.datavalley.ai

Tech Stack: Next.js, TypeScript, Node.js, Express, MongoDB, Redis, JWT, Wasabi S3

- Architected and deployed a **scalable LMS platform** supporting 500+ users with multi-role access (Admin, Trainer, Student).
- Built backend systems for **course management, video streaming, assessments, and coding challenges** with optimized processing.
- Developed **interactive dashboards** for tracking student progress, performance analytics, and engagement metrics.
- Improved system performance to **sub-second API response times** using Redis caching and database optimization.
- Implemented **real-time features using WebSockets** for live quizzes, coding evaluations, and instant progress updates.
- Integrated **Wasabi S3 for scalable media storage** and implemented CI/CD pipelines using Vercel and Render for reliable deployments.

EDUCATION

B.Tech-Computer Science and Engineering

Annamacharya Institute of Technology and Sciences | 2019-2023

Intermediate (Mathematics, Physics, Chemistry)

Narayana Junior College, Telangana Board | 2017-2019

High School (SSC)

S.T Anthony's High School | 2017

CERTIFICATIONS

- HackerRank - Software Engineer Certificate
  (Problem Solving, SQL, REST APIs)
- CodeChef - Frontend Development Certificate
  (HTML, CSS, Javascript)
- Datavalley.ai - Hackathon Participation Certificate
  (Developed an IoT Device Tracking Application during the hackathon)
